

FUNDICIÓN NODULAR, S.A. is committed to make its industrial activities and processes compatible with the environment protection, working as much as possible in accordance with the international principles of sustainable development

Consequently the environmental principles assumed by **FUNDICION NODULAR, S.A.** are:

- ❖ Gradually implement an effective Environmental Management System, which enables a continuous improvement in environmental performance, minimizing and preventing adverse effects.
- ❖ Rational use of resources: water, electricity, gas, etc
- ❖ Minimize the environmental impact of processes, by controlling waste and pollution risks, and implementing effective systems for pollution prevention.
- ❖ Comply with the legislation and other regulatory requirements on environmental matters.
- ❖ Train and raise awareness of **FUNDICIÓN NODULAR, S.A.**' staff with the aim to create a positive atmosphere towards the progress of any environmental measure.
- ❖ Transmit our environmental commitment to our entire surrounding environment , especially to our suppliers, and cooperate with our customers in their environmental management program.
- ❖ Continually improve the environmental performance of **FUNDICIÓN NODULAR, S.A.** by establishing goals and objectives.
- ❖ **FUNDICIÓN NODULAR, S.A.** environment policy is of public domain.

Based on these principles **FUNDICIÓN NODULAR, S.A.** management board establishes mechanisms for the continuous improvement of our environmental performance.

Lugones, October 1st 2008

D. Jorge Farrás Moirón
Vice-President / General Manager.
